in Peritrochanteric Fractures of Femur

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | A Comparative Analysis of the Operative Techniques in Peritrochanteric Fractures of Femur | The fractures of the peritrochanteric region of the femur are one of the most common injuries seen in current orthopaedic practice. Incidence of these fractures has increased significantly during recent decades and this tendency will probably continue in near future due to rising age of population. Closed methods of treatment have shown higher mortality rates & have largely been...
