Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from **Asymptotic Solution of Systems of Linear Ordinary Differential Equations With Discontinuous Coefficients** In this system the coefficient matrix ka depends upon a real parameter k . Asymptotic expansions of u in powers of kel , which are valid as $k w$ are well known. They hold provided that A .has continuous derivatives of all orders and satisfies certain other conditions. But if some derivative of A is discontinuous, then only a finite number of terms in the expansion of u are known. We consider the problem of finding additional terms when A and its derivatives have finite jump discontinuities. We shall show how to solve this problem, and we shall find explicitly the next term beyond those previously known. This term is discontinuous, whereas the preceding terms are all con tinuous. This fact is significant in various applications. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
