## INTERNATIONAL CORN PLANTERS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from International Corn Planters The planters are all steel with the exception of the tongue. The frame of the planters is one continuous piece of high grade steel, the rear portion being circular in form, giving the frame exceptional strength and stability. The frame is attached to the runner frame by two large pins, making a strong connection but allowing the runner frame to pivot independently and to conform to surface irregularities. The entire construction of the International corn planters is simple, but very efficient. When the kernels are well planted, more than half of man's battle in securing a good crop is won. The International corn planter was designed for the one purpose of putting the corn in the ground in the best possible manner for rapid growth. It is in the field that the International corn planter proves its superiority. Provided with variable and automatic drops, and with edge drop, fiat drop, or full hill drop plates, the corn is put into the ground according to the power of the soil to develop it to full maturity. Practically all fields vary as to the producing ability of the soil. A planter with an assortment of drops, therefore, becomes of great assistance in securing a uniform crop and enabling the soil to develop the seed to its fullest extent.
