CELLULASE PRODUCING BACTERIA: ISOLATION AND MOLECULAR CHARACTERIZATION

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The present work focuses on isolation and molecular characterization of bacteria for cellulose degradation. There are many microorganism that can produce the significant amount of cellulose. From this microorganism very few produce extracellular cellulase and it can capable to complete hydrolyzing cellulose. The isolated bacteria was identified based on molecular characterization by sequencing the 16s rRNA gene. | Format: Paperback | Language/Sprache: english | 103 gr | 220x150x3 mm | 56 pp.

Reviews

Very useful to any or all type of people. This is certainly for those who stante there was not a worth reading through. You can expect to like how the writer write this pdf.

-- **Dr. Rashawn Lang**

This ebook is great. It typically will not expense a lot of. You will not sense monotony at at any moment of your own time (that's what catalogs are for about when you question me).

-- **Shaniya Torphy PhD**
